

Today media and technology are 2 of the top 5 influences in people's lives.

Reviews

URL:
www.mercyhillchurch.com

Location:
State College, PA

Denomination:
Assemblies of God

Size: 50

Budget: \$2,000 - \$2,500

Features

Hybrid Flash/HTML site: The site uses a hybrid of flash and HTML in order to provide maximum flexibility in editing the content, while at the same time providing an excellent presentation and enhanced interactivity

Flash Presentation of Core

Values: The 10 core values of the church are now more than just a list of words on a page. Through the use of vivid imagery, Mercy Hill's core values come to life through a scrolling presentation of graphics that perfectly match the message of each value.

Sermon Flow Multimedia Center: Mercy Hill added faithHighway's latest media center, Sermon Flow, to their site. This tool allows visitors and members alike to quickly flip through current and archived messages from the church from any computer connected to the internet. Site visitors can easily subscribe to podcasts, listen to messages, watch videos, search, and comment on media all in the same location. This tool is powered by faithHighway's award winning Sermon Connect product.

"I love that anyone can update it without being an expert."

- Pastor Davis

Mercy Hill is a church in State College that welcomes people from all backgrounds and walks of life. They are a missional church that believes in sending people back in to the world to demonstrate the power of the gospel in both word and deed. In April 2009, the church launched a redesigned website. The major emphasis of the redesign was to build a site that was totally unlike any church website they had ever seen. This graphically enhanced site has allowed Mercy Hill to take the presentation of the gospel to new levels in order to capture the attention of people who might not otherwise feel comfortable approaching Christ through His church.
